

SmarTickets

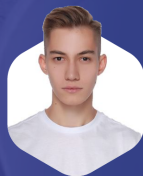

Disrupting the black
market of tickets

Mike Petrov, Front-End Developer

Skills: JavaScript, React JS, Solidity, MongoDB

email: mis5116@yandex.ru

Alexey Poloz, Back-End Developer

Skills: Hyperledger, ERC21, Python, Java, Go

email: upolozal@gmail.com

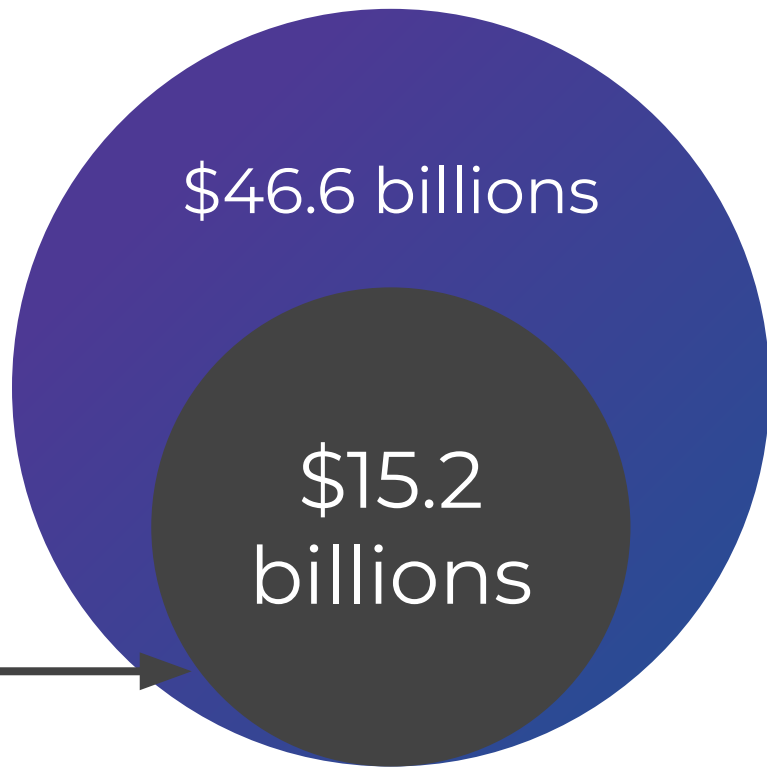

The problem

1. No tickets after Sold Out
2. Plenty of scammers
3. No way to resell tickets
4. ...

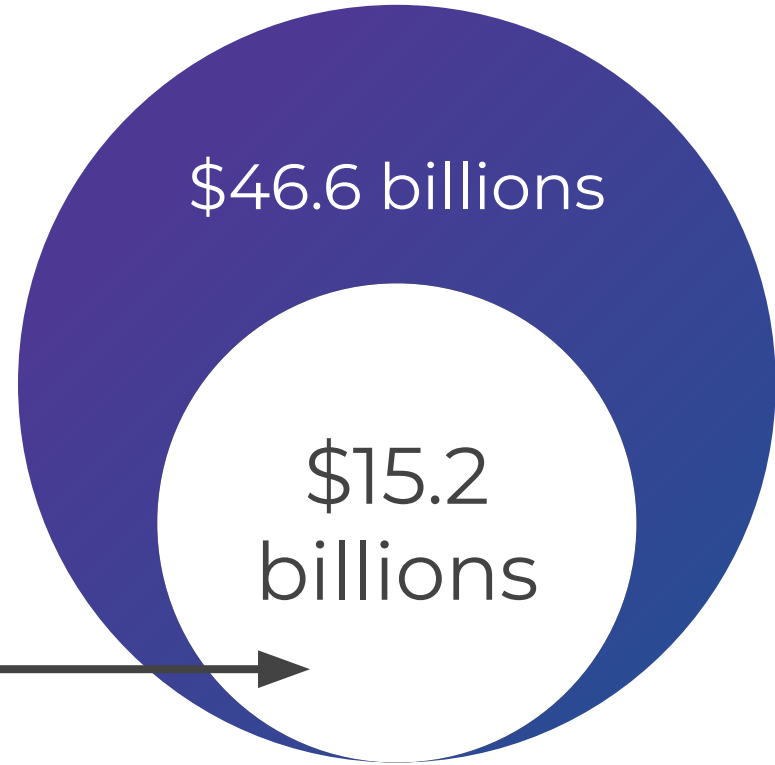

The global market of tickets

The black market

The global market of tickets

The White Market

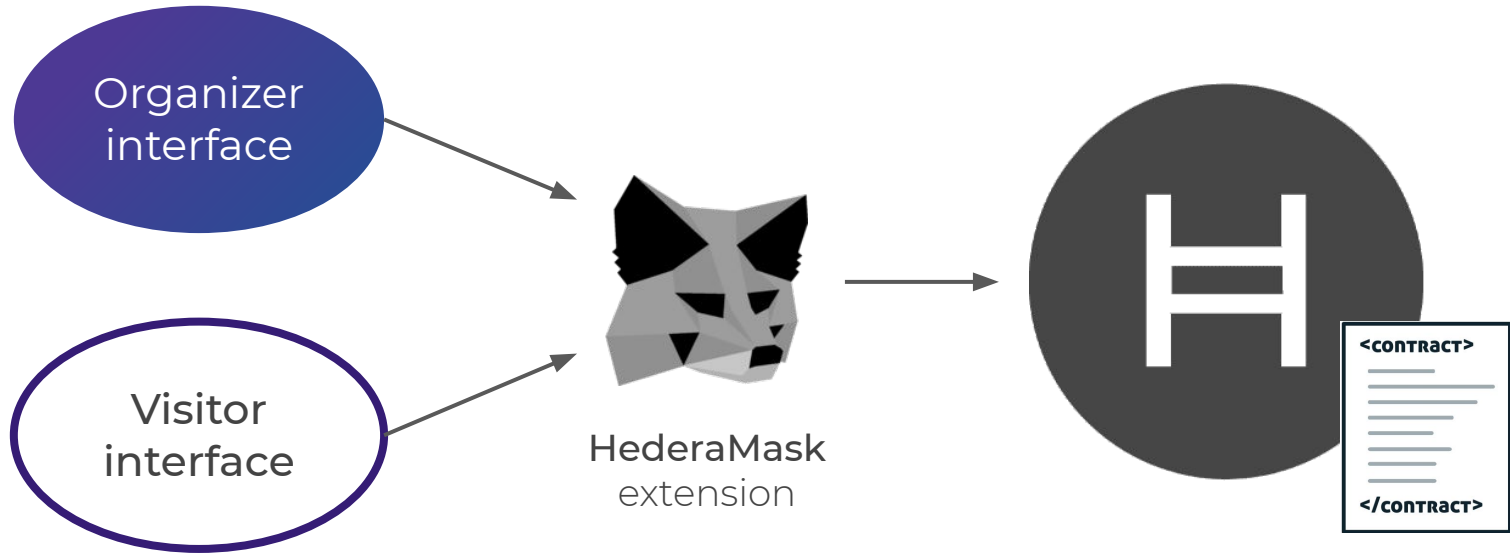

Our solution — ticket as a digital asset

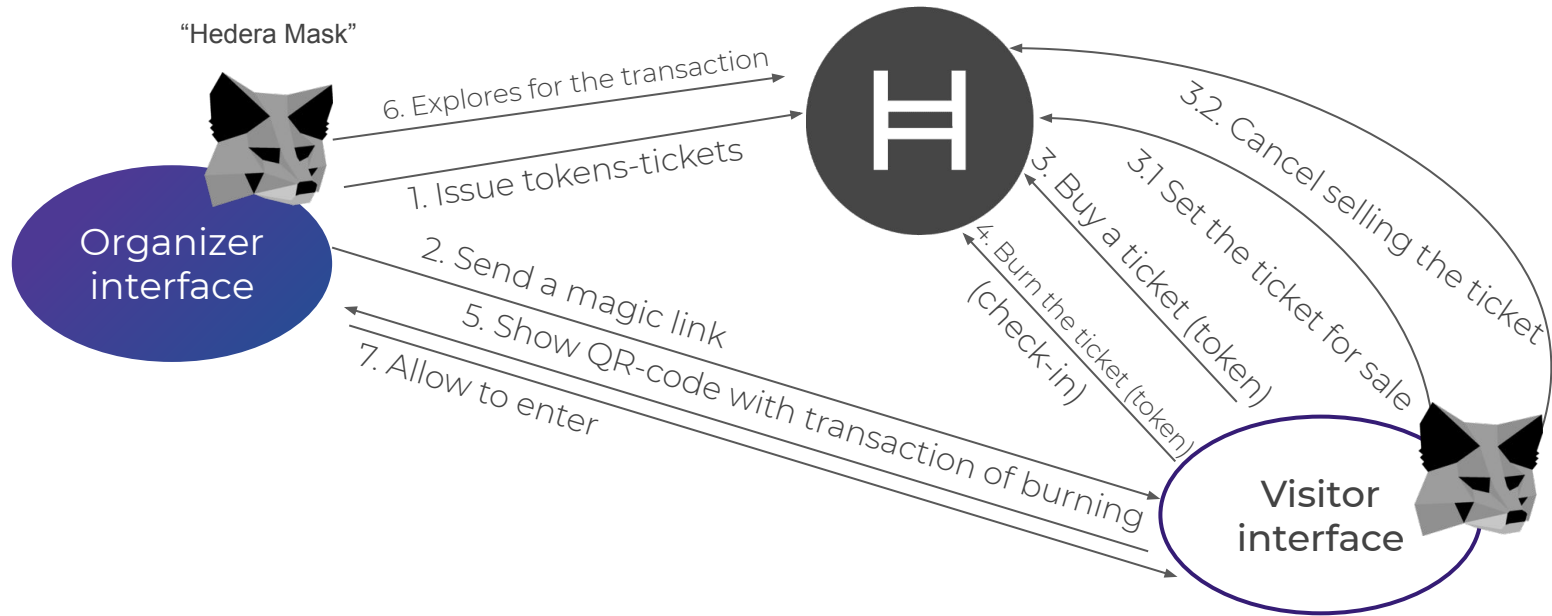

- secure (say goodbye to the scammers)
- tradable (resellable => available even after sold out)
- transparent
- zero issue and sale commission

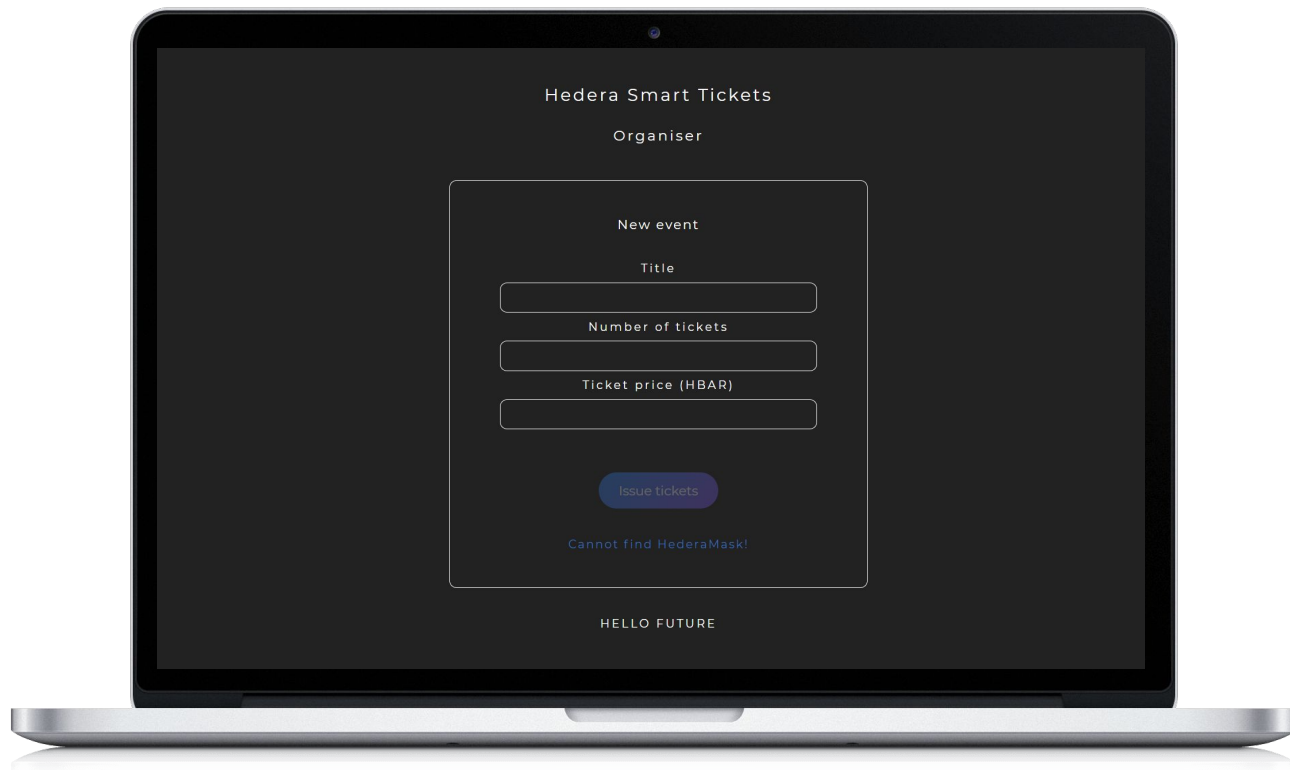

What have we done so far?

The protocol of interaction

Further steps

- Ticket checker based on KYC
- Explorer of available tickets and events
- Application for other types of assets

Win-Win-Win-Win Solution

Visitors can buy a ticket even after sold out or sell it in case of change of plans or just to earn on ticket trading

Organizers don't waste money and time on issuing and selling tickets and earn extra money after sold out because of commissions on the White Market

Our world gets a solution for mass digital adoption

Our team has a chance to grab a prize in Dubai and launch a startup to share the solution with millions

But who lose? - the dark resellers and scammers

See you in Dubai!
